# Status of the SARS-CoV-2 variant Omicron in Denmark

## Status for SARS-CoV-2 varianten omikron i Danmark

16 December 2021

Data extracted: 16 December 2021 at 12.30

Data opgjort: 16. december 2021 kl. 12.30

**Bemærk at datagrundlaget til rapporten er ændret pr. 16-12-2021.**

I tidligere versioner af rapporten indgik kun prøverresultater på SARS-CoV-2-positive prøver fra de kliniske mikrobiologiske afdelinger, hvor der var foretaget variant-PCR.

Dette har særligt betydning for tallene på indlagte i tabel 6, hvor der ses en relativ stor stigning i indlagte med andre varianter end omikron. Det betyder også, at det samlede antal SARS-CoV-2 prøver pr. prøvedato er højere for stort set alle datoer. Ændringerne påvirker ikke tallene for omikron varianten.

Change of data reference as of 2021-12-16.

In the previous version of this table, only cases that was tested for a possible variant of concern, were included in the other variants columns, across tables and figures. These columns now contain all cases from 22 November to 13 December 2021. These changes especially increase non-omicron admission in table 6, and results in slightly increased number of SARS-CoV-2. The changes do not affect the omicron results.

There are currently registered a total of 9,009 B.1.1.529 (Omicron) SARS-CoV-2 cases in Denmark.

Few test results may not be included in the report due to data delays. Furthermore, small changes in data can occur retrospectively.

Omicron cases are identified through variant PCR and whole-genome sequencing (WGS).

Der er for nuværende fundet 9.009 tilfælde af SARS-CoV-2 varianten omikron (B.1.1.529) i Danmark.

Da data opgøres med en vis forsinkelse vil de seneste dages prøvesvar ikke indgå i rapporten og få tilfælde kan mangle.

Det totale antal omikrontilfælde er opgjort ud fra variant-PCR og helgenomssekventering (WGS).

**Table 1. Number of Omicron cases in Denmark**

**Tabel 1. Antal omikrontilfælde i Danmark**

Status	No. of Omicron cases	%	No. of cases since last report
Variant PCR matching B.1.1.529	8,510	94.5	2,846
WGS confirmed omicron cases	499	5.5	116
Total	9,009	100	2,962

Please note that data collection takes longer for WGS data than for variant PCR data. WGS data is not run during the weekend. The change in number of cases since last report includes the total number of new positive test results and does not refer to a specific test date.

Bemærk venligst, at WGS data er yderligere forsinket ift. variant-PCR data. WGS data opgøres ikke i weekenden. Ændringen i antal cases siden sidste rapport beskriver det samlede antal nye positive prøveresultater siden sidste rapport og refererer ikke til en specifik prøvedato.

Individuals aged 5-11 years have recently been invited for COVID-19 vaccination, hence the vaccination coverage is relatively low in this age group and not included in Table 4.

Personer i aldersgruppen 5-11 år er fornødt blevet inviteret til covid-19-vaccination, hvorfor vaccinationstilstslutningen i denne aldersgruppe foreløbigt er begrænset. Denne aldersgruppe er derfor ikke inkluderet i Tabel 4.

Tested positive 48 hrs or more after admission: Includes all individuals who have been admitted more than 48 hours before they tested positive for Omicron. This number covers all hospital-acquired Omicron cases.

Tested positive prior or within 48 hrs after admission: Includes all individuals who have tested positive before being admitted or tested positive up to 48 hours after admission.

Tested positive 48 hrs or more after admission: Inkluderer alle personer der har været indlagt mere end 48 timer før vedkommende testest positiv for Omicron. Dvs., dette tal dækker over hospitals-erhvervet omikron tilfælde.

Tested positive prior or within 48 hrs after admission: Inkluderer alle personer der er testet positiv før de indlægges eller testes positiv op til 48 timer efter indlæggelse.
